

# Replacement ticket: items returned to a supplier

Step by step, with screenshots

This guide follows one real example, step by step, with screenshots: **6 defective items are returned to the supplier** and the supplier sends the replacement in two deliveries (4 first, then 2).

| Person              | Role in the example                                      |
|---------------------|----------------------------------------------------------|
| Warehouse In-Charge | Opens the ticket and receives the replacement deliveries |
| Head Auditor        | Approves the return and the cost of each delivery        |
| Accounting Head     | Sees the accounting entries                              |

The ticket is tagged to the **supplier** and stays open until replacement items arrive. Red numbered boxes in the screenshots match the numbered notes under each picture.

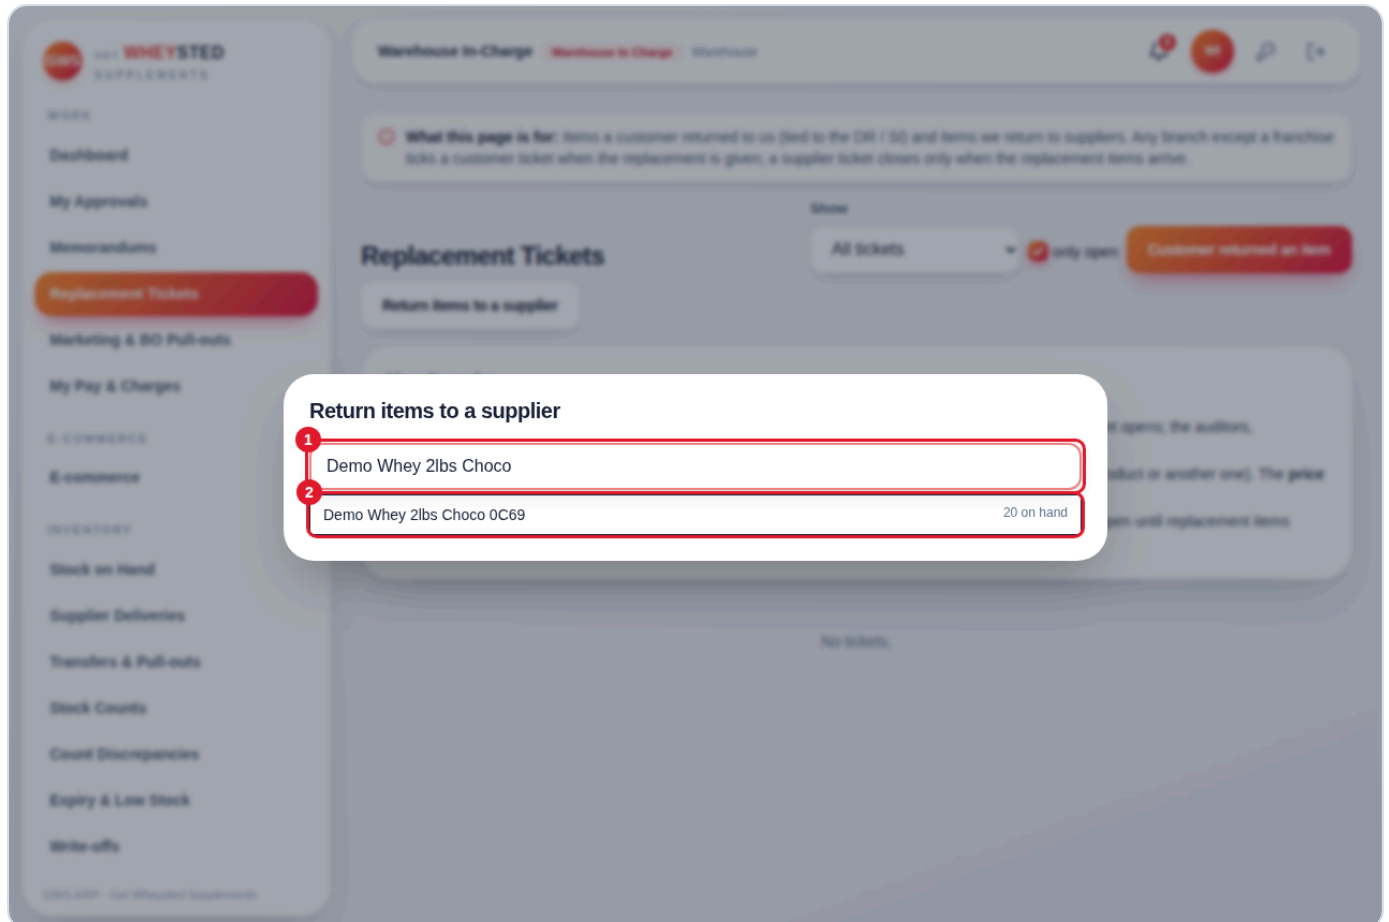

In the menu press **Replacement Tickets**, then **Return items to a supplier**.

## 2 Choose the item

### Warehouse In-Charge

Search the product. Only products this location has in stock are listed, with the quantity on hand. Press the product.

- 1 The search box.
- 2 The product found and its stock.

### 3 Quantity, supplier and reason

#### Warehouse In-Charge

Type the **quantity**, check the **supplier that must replace it** (the product's own supplier is chosen for you), choose the **reason** and write what happened. Press **Open the ticket**.

Nothing leaves the stock yet. The Head Auditor must approve the return first.

- 1 Quantity returned.
- 2 Supplier that must replace it: the ticket is tagged to this supplier.
- 3 Reason.
- 4 Open the ticket.

## 4 The ticket is open: attach a photo

### Warehouse In-Charge

The ticket (WH-RT-...) shows the item, quantity, supplier and the status *waiting for the Head Auditor*. Attach a photo and any note from the supplier.

The auditors, Accounting and the Owner are notified.

The screenshot displays the 'Warehouse In-Charge' interface. On the left is a sidebar with a navigation menu. The main content area shows a ticket for 'WH-RT-000001' with a status of 'waiting for the Head Auditor'. The ticket details include item information (Demo Whey 2lbs Choco 0C69, QTY 6), reason (defective), and supplier (SUP-107). It also shows that 0 of 6 replacement items have arrived. A note mentions a lot recall. At the bottom, there is a section for attaching photos and papers, with a placeholder for 'photo.png' and an 'Open' button.

Accounting entry now: **Debit Receivable from Suppliers - Returned Items, Credit Inventory** (at cost).

- 1 Ticket number and status.
- 2 The panel that will list the deliveries that replace these items.

## 7 When the replacement arrives: new delivery linked to the ticket

### Warehouse In-Charge

Open **Supplier Deliveries**. Choose the **same supplier**. A new field appears: **This delivery replaces a ticket**. Choose the ticket.

Add the items that arrived (quantity, expiry date, batch), attach the supplier's delivery receipt and press **Create draft**.

A delivery from another supplier cannot be linked to the ticket.

**Warehouse In-Charge** Warehouse In Charge Warehouse

**What this page is for:** Record goods delivered by suppliers (quantity, freebies, expiry, batch) with the supplier's delivery receipt. The Warehouse In-Charge checks an associate's goods first, then the Head Auditor approves the cost, and the stock is added.

### Supplier Deliveries

**New receiving**

Supplier (code) SUP-107 **1** This delivery replaces a ticket WH-RT-000001 · Demo Whey 2 Supplier invoice / DR # SUP-DR-7741

its arrival closes the replacement ticket

Notes Upload Supplier Delivery Receipt

Change file photo.png

Photo or PDF of the supplier's DR / invoice

Add product...

| PRODUCT                   | QTY | FREE (FREEBIE) | FLAVOR     | EXPIRY     | BATCH # |
|---------------------------|-----|----------------|------------|------------|---------|
| Demo Whey 2lbs Choco OC69 | 4   | 0              | e.g. Choco | 06/30/2028 | RPL-A1  |

**2** + another flavor / expiry ×

Items the supplier gave for free go in **Free (freebie)**, not Qty: they are added to stock at the approved cost and recorded as Other Income – Supplier Freebies. If one item arrives in several flavors or with different expiry dates, use "+ another flavor / expiry" and enter the quantity of each. Each flavor and date becomes its own batch, shown everywhere the item is sold or moved. The item is still counted as one SKU.

**3** Create draft

Export xlsx CSV

DATE CONTROL # SUPPLIER REF LINES STATUS

- 1 The ticket this delivery replaces. Only this link lets the arrival close the ticket.
- 2 The items that arrived. The replacement may be a different product.
- 3 Create draft.

8 Submit the delivery

Warehouse In-Charge

Check the draft (you can print it or delete it if it was made by mistake) and press **Submit for cost approval**.

HA

What this page is for:

Items a customer returned to us (tied to the DR / SI) and items we return to suppliers. Any branch except a franchise ticks a customer ticket when the replacement is given; a supplier ticket closes only when the replacement items arrive.

Replacement Tickets

Show

All tickets

only open

Customer returned an item

Return items to a supplier

How it works

Customer returned an item:

find the DR / SI it was sold on, choose the item, quantity and reason. A ticket opens; the auditors, Accounting, the Owner, the sales associate of that DR and every branch are told.

Any branch except a franchise

ticks the ticket when it gives the customer the replacement (the same product or another one). The price difference against the DR is worked out by itself. The Head Auditor approves; then the ticket closes.

Return to a supplier:

the ticket is tagged to the supplier; the Head Auditor approves the return. It stays open until replacement items arrive on a supplier delivery linked to the ticket; only that closes it.

1 Suppliers that still owe us replacements.

## 12 The rest arrives: the ticket closes

### Warehouse In-Charge

The second delivery (6 of 6 in total) is received the same way, linked to the same ticket. When the arrived quantity reaches the quantity sent, the ticket **closes by itself**.

If the replacement is a different product or has another cost, the **value difference** is shown: here ₱100.00 more than we sent, so we owe the supplier that amount.

## Summary: who does what

| Step | Who                               | What                                                                                          |
|------|-----------------------------------|-----------------------------------------------------------------------------------------------|
| 1    | Warehouse In-Charge (or a branch) | Opens the ticket: product, quantity, supplier, reason, photo                                  |
| 2    | Head Auditor (or Owner)           | Approves the return; the items leave the stock                                                |
| 3    | Warehouse In-Charge               | Records each replacement delivery and links it to the ticket                                  |
| 4    | Head Auditor                      | Approves the cost of each delivery as usual                                                   |
| 5    | System                            | Counts what arrived; part keeps the ticket open, enough closes it; shows the value difference |
| 6    | Accounting                        | Sees the entries and the suppliers who still owe us                                           |

## Accounting entries

| When                                           | Debit                                         | Credit                                        |
|------------------------------------------------|-----------------------------------------------|-----------------------------------------------|
| Return approved                                | Receivable from Suppliers -<br>Returned Items | Inventory (at cost)                           |
| Replacement delivery posted<br>(normal)        | Inventory                                     | Accounts Payable - supplier                   |
| ... and the part that replaces what<br>we sent | Accounts Payable - supplier                   | Receivable from Suppliers -<br>Returned Items |

## Good to know

- **Only the arrival of replacement items closes the ticket.** Nothing else, not even a note.
- The delivery must be from the same supplier and linked to the ticket (field "This delivery replaces a ticket").
- A delivery worth more than we sent leaves the extra payable; worth less leaves a balance the supplier still owes us (Accounting follows it up).
- A ticket that has not been approved yet can be cancelled by whoever opened it, the Head Auditor or the Owner.
- Entries are booked when the Owner has switched on automatic journal posting.
