GWS-ERP Acceptance Test

Checklist per user · 30 accounts · build of 29 September 2026

How to use this manual

Before testing: On the office Mac run pnpm install, pnpm update-db and pnpm dev. Keep that window open and use http://localhost:5173.

Password: Every sample account uses ChangeMe!2026. On first sign-in, accept the accountability statement.

One page set per person: Each account starts on a new page. Print only the pages for the person testing, or the separate PDF for that account.

Marking: Do each numbered step, compare with “You should see”, then tick Pass, Fail or N/A. For every Fail, write what happened in Notes (and the screenshot name if you took one).

Two roles at once: Many checks need another account to act first. Follow the flow order on the next page, and use two browsers (for example Safari and Chrome) to be two people.

When done: Count the ticks in the result box, sign, and hand the pages to the Owner. Send every Fail to the developer with its account and check number (for example sales.westave SA-14).
